

J.M.A (Japan Medaka Association) is a private non-profit organization established in April 2009 after the preparation period for establishment on September 22, 2008 for the purpose of developing and promoting Medaka culture and exchanging Medaka lovers.

We have established branches not only in Japan but also in many countries around the world, and actively provide opportunities for Medaka breeding and information exchange among members to help improve the level of Medaka breeding.

As an activity of J.M.A, it holds events such as the Medaka exhibition and distributes magazines, photo books, and calendars. It also settles the correct Medaka culture by responding to the registration of Medaka varieties with new characteristics, regular improvement of evaluation standards, and problems of naming based on the Medaka registration standards set by the association.
